

PERSONAL FLOWW®

patented technology 

Making Tech Organic

Thank you for purchasing the personalFloww®. You have acquired a device that has been developed to support a conscious lifestyle while at the same time enjoying the advantages of modern technology. In our products we make clever use of electromagnetic fields (EMF) as an energy source to generate a field with frequencies that can also be found in nature. This field we call the Floww® field. This newly created field is more organic and more aligned with your own biological resonance. While carrying your personalFloww® you feel better in a wireless environment. In addition, you have full benefit of your technological devices the whole day through, while supporting your vitality simultaneously.

Sustainability

No batteries or other energy sources are required for Floww. Our products are sustainable for people and planet. Users confirm that the patented Floww Health Technology supports the preservation of peace and vitality in the human body. As such, we make mobiles, computers and your living environments more organic. Thanks to the Floww® Field users often experience more vitality as soon as they start to use a Floww®-product.

Range of the personalFloww®

The personalFloww® creates an organic field around the user. For effective operation the your personalFloww® should be carried within a radius of 0.5 meter around your body.

Instructions for use of the personalFloww®

- In daytime, wear your personalFloww® close to the body. For example, in your bag or the pocket of your jacket, for women this could also be the bra.
- At night, keep it under your pillow or place it on the bedside table. For optimal sleep, we recommend a home set. This has been designed specifically for the home, the personalFloww has been developed for usage on the road.
- For optimal performance, we recommend strict personal use of the personalFloww® during the first two weeks. Some people are electro hypersensitive (EHS) but are unaware of this. We recommend you to gradually build your use of your personalFloww® by alternately carrying it with you for an hour and then removing it for the next hour.

For a gradual build-up, we also recommend you not to place your personalFloww® on your bedside table or under your cushion overnight immediately, but to wait up to two weeks.

Research & Development

Over the years we have conducted and collected a substantial and highly qualitative research portfolio. This involves both our own research as well as external parties auditing the effectiveness of Floww products. You can read more about this under www.floww.com/faq.

During the production and packaging of Floww®- products, environment- and human friendly materials are used where possible.

The Floww technology is based upon 3 principles:

1) Energy Harvesting

Floww technology makes clever use of present electromagnetic fields (EMF) to generate a different type of field, like solar panels do. The technology comprises extraction means for extracting electric power from the present electromagnetic field and transmission means for transmitting another field more aligned with nature. The more powerful the EMF, the stronger the field that is produced by Floww.

2) Biomimicry

This science strives to imitate the genius systems of nature in the development and design of products, systems and processes. In Floww technology this is reflected by use of plants and Schumann resonances that allow for the creation of natural fields.

3) Making tech organic

People, animals and plants function better in nature. In Floww technology we have combined patented electrotechnical applications with natural frequencies like Schumann resonances. This way you have your own piece of nature everywhere you go.

User tips and guarantee
